**Brief**

Jwaneng Mine through Geotechnical Section is currently running Cut 8 Optimisation project for the modelling and analysis of the geotechnical data collected from the Cut 8 side of the pit. The constructed models from the data will be used as input to the dynamic Cut 8 slope design.

Experienced companies within Botswana are invited to assist the Geotechnical Section in collection and analysis of the data for a period of three (3) years. Data collection methodology shall be mapping, inspection and core logging. Mapping will be primarily done through window mapping and laser scanning, whereas logging shall concentrate on validation of the core data collected by other companies. Logging validation will be done for all availed data and subsequently the data shall be input into the Mine geoscience database. Upon request, the consultants will be required to inspect selected areas in the pit for validation of models.

Bidders are required to attend a compulsory site visit in order to familiarize themselves with the site, the scope of services and the conditions under which the services are to be provided. The site visit will be held on **Wednesday 13th February 2019 at 10:30hrs.** Tenderers are to meet Ms. Ludo Gabanakgosi at the JREP Boardroom, Blue Area, MRM Projects, Jwaneng Mine. Tenderers must bring tender documents to the meeting. Tenderers are required to arrange their own transport, meals and accommodation. In addition to that, it is a requirement to have full PPE i.e. (Hard hat, safety goggles, long sleeved reflective shirt, long trousers and steel toe safety boots) All bidders are sure that they attend a safety and security induction at the Mine Security Checkpoint which is held at 8 am daily. Failure to do so will result in them not being allowed to enter the Mine.
