

INVITATION TO TENDER

Doc1968644244 – Construction of Catch Fence at Jwaneng Mine

Suitably qualified and experienced entities are hereby invited to tender for the following services to Debswana Diamond Company (Pty) Ltd at Jwaneng Mine.

Brief

Debswana Jwaneng Mine is an open pit operation comprised of complex geological formation on its eastern pit walls. The adopted Dynamic Mine Design that continually optimizes the emerging site condition which differ from the previous assumptions have led to date the adoption of inclined stag configuration. The improved stability of the Battered slope design proved that battering the slope reduces slope support requirement therefore further design optimizations were done where all the benches were removed (Cut8 5ev5v15 But_v13 – Benchless design). The inclined stack configuration meant that there will be no catch benches, presenting an elevated rock fall risk. A technical investigation was carried at the benchless design area and rockfall simulation were conducted to qualify the need for a catch fence for the Mine to continue operating safely and efficiently.

The Scope of Work include includes but is not limited to the supply, delivery to site, and installation of catch fence 4m high for total length of 430 meters.

Compulsory site visit

Prospective tenderers are required to attend a Compulsory Pre-Bid Meeting in order to get more clarity on the scope of services and the conditions under which the services are to be executed. Tenderers will also have an opportunity to ask questions on the scope of services. The site visit details are as follows;
